

CheckMyTrip Premium

Premium service provided by your travel agency

CheckMyTrip Premium is a travel agency service that supplies business and frequent travelers with all the travel information needed, within one single app. Wherever you may be, you will always have access to your travel itinerary and actively be informed about changes. Direct access to online check-in, instant status of your flight or rail bookings, as well as optional synchronization with your calendar make CheckMyTrip Premium your perfect travel companion. Sounds good? Ask your travel agency.

Itinerary including map – car journeys, hotels and a lot more can be added.

Your itinerary – comfortable and expandable

After the booking by your travel agency you automatically receive your itinerary on your smartphone – including travel data for flight, hotel, car and rail. As needed you can add your own activities to your travel plan, e.g. a car drive to the airport, and get a complete overview of your journey.

Current itinerary at any time

In case of itinerary changes, e.g. a flight delay, you will be informed actively by a push notification and the itinerary will be updated automatically. Also, any changes in train schedules will be displayed in real-time.

Direct contact to your travel agency

Important information from your travel agency is displayed directly in the app as a personal message. In case of any questions or requests you have all contact details ready at hand.

Data security and data privacy guaranteed

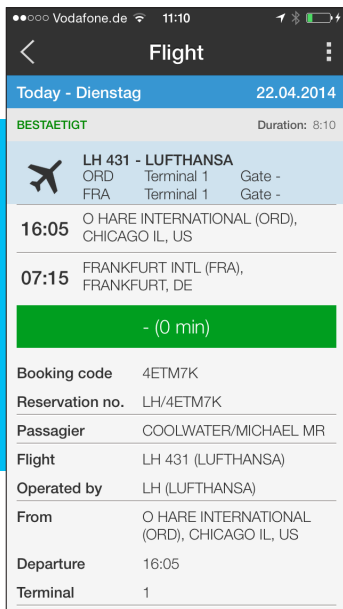

The data transfer starting with the booking of your travel until the supply of your mobile itinerary is carried out through a secure data connection and by computer centres with the highest safety standard – a guarantee for the highest standard in data security. The verification of data security terms of reference according to the German Bundesdatenschutzgesetz (BDSG) is for granted as well.

Functional overview

Login data of www.CheckMyTrip.com cannot be used for CheckMyTrip Premium. The registration for CheckMyTrip Premium is exclusively offered by your travel agency. The manual import of travel itineraries per booking code and last name is not provided by CheckMyTrip Premium.

Usage of CheckMyTrip Premium

CheckMyTrip Premium may be used by every travel agency that is connected to the Amadeus system.

1. Download the CheckMyTrip Premium app from the App Store, BlackBerry® App World or Google Play to your smartphone. In the app you will find an itinerary example (no registration necessary).
2. Inform your travel agency that you would like to use CheckMyTrip Premium.
3. Inform your travel agency about your e-mail address.
4. With your first booking you will receive a registration confirmation per e-mail. Create your own password to complete the registration process.
5. Now start the CheckMyTrip Premium app and log in with your e-mail address and password.

Once your registration is complete you will automatically receive your travel itinerary.

The log in data is stored in the app. All further travel itineraries are sent to you from your travel agency automatically by push notification. The parallel usage of the same log in data on several smartphones is provided.
