Tell us which hotel you want, we'll go and get them for you!

Amadeus Hotels content choice

Amadeus Hotels offers an extensive breadth and depth of choice in hotel accommodation. We remove the complexity, cost and inconvenience of having to shop multiple websites and booking systems by offering a wide variety of properties from combined sources, available to book in real time through one centralised content platform.

Your challenge

Every time you have a specific request from your traveller and need to book an independent or small hotel in out-of-the-way-locations, it's an exhausting process as every search means accessing various providers: hotel websites, online travel sites, calling hotels directly and the list goes on...

This is causing extra work for every single booking. Having to use multiple disconnected systems results in lack of control, and when you finally make a booking you cannot be sure that errors have not been made with these manual tasks.

Moreover, it is quite a challenge to chase each and every hotel to collect your commission for every single booking.

Benefits

-  We automate your manual bookings processes, so you spend less time searching and can spend more time selling and servicing your customers
-  We provide full commission handling and contractually enforce our hotel properties to use our commission payment services, ensuring excellent relations
-  Full business process integrations. Bookings are actively integrated to the Amadeus PNR, ensuring full data integrity across all systems for all travel components booked (air, hotel, cars, rail, etc.) so it improves your productivity, increases service levels and reduces manual processing errors
