

# Amadeus LinkHotel

Our tailor-made global hotel representation company for independent hotels and small chains

## About the GDS

The GDS (Global Distribution System) refers to the reservation tool that travel agents worldwide use when making an air, hotel, car or other travel service booking. There are over 500,000 travel sellers directly connected to the Amadeus GDS alone.

## About Amadeus LinkHotel

Amadeus LinkHotel is a multi-GDS representation and services company for 2 to 5 star independent hotels, B&Bs, resorts, serviced apartments and small-medium chains. We distribute your hotel inventory on the world's leading Global Distribution Systems (Amadeus, Sabre and Travelport's Galileo & Worldspan) and DHISCO (Pegasus ODD), so your hotel is distributed to over 1 million travel agents worldwide.

## Benefits

Stable a reliable connectivity to the world's main GDSs and DHISCO (Pegasus ODD), which makes it possible for travel sellers to access and book your hotel in real-time.

We work with Worldwide Payment Systems (WPS) to ensure prompt and hassle-free commission handling. We manage payments for you and you can find all the details on the travel agency commissions due in your monthly invoice.

Our Account Managers give you personalised services based on your hotel's needs. Importantly, Amadeus LinkHotel provides you with local and multilingual support.

In partnership with Lanyon, we help you to create and submit Corporate RFPs (Request for Proposal) and requests to Consortia, which bring together some of the biggest travel agencies and travel management companies to book your hotel.

Amadeus LinkHotel gives you access to detailed booking data, which allows you to track your booking performance, adjust your rates and react to ever-changing market needs.

Amadeus LinkHotel customers can reach millions of travellers faster by subscribing to Amadeus Instant Preference (AIP), a GDS positioning tool, with low investment. AIP puts hotels at the top of travel agents' screen across the world.
