

# Amadeus Selling Platform Connect

Quarterly product update: Q1 2023

New enhancements. Key highlights. Productivity hacks.

## Cross recommendation comparison

Select fares from different flight solutions and Fare Families and compare the associated services promptly. Add up to 6 recommendations to find the best option for the traveler.

## New flight search options

More chances to match your customer needs. Search the “Baggage included” option for all content types. See fare type at bound level and filter using mixed fare criteria. Profit from the new Amenities filter.

## Additional NDC servicing enhancements

Travel consultants can now click on the ticket number hyperlink or select a checkbox to get a pop-up with coupon status. And they can also enable waiver codes during exchange.

## More with B2B Wallet in booking.com

More efficiency and choice with Amadeus B2B Wallet fully integrated into the booking flows for Booking.com's extensive content. A wide range of virtual cards is available and no more paying at checkout.

## An upgraded login experience

Easier login, improved performance and enhanced usability with a fresh new look to facilitate travel consultants' day-to-day work.
