

Amadeus Selling Platform Connect

Quarterly product update: Q3 2023

New enhancements. Key highlights. Productivity hacks.

Passenger Type Codes on search page

Offer the best deals to your customers more easily. You now have more possibilities to get relevant recommendations as several Passenger Type Codes were added to the search page.

12/24-hour clock modes available

12/24 clock modes based on TCM office profile field will be available on the shopping results page, regardless of the language version selected at login. Time display consistency is ensured. Retain time clock modes during booking flow.

NDC: OB fees with credit card & coupon display

Calculate OB fees with full credit card numbers. You can enter the credit card number manually or select it from the list. Display the coupon status in NDC exchange panel, booking file and ticket section.

Filter enhancements for more productivity

Access the most frequently used filters easily and quickly, without scrolling, thanks to filter reordering. Boost efficiency with the new filter enhancement for amenities. Filter “free” and “chargeable” amenities.

Hotel Modify button

Save time and effort when adapting to changes in your customers’ travel plans. Adjust check-in/check-out dates and avoid cancellation fees without incurring additional costs for your clients.
