

## Amadeus Smart Cache

Our simplified Cache Solution which is based on Extreme Search Technology. Helping you to achieve quick search results; whilst still maintaining transaction based costs. Smart Cache is one domain of data which users have unlimited access to. This is refreshed every 24 hours. Offers are pre-calculated. Customers can filter results (e.g. date range, duration, airlines) to get a quicker result. Smart Cache gives best price of query

### How can you best meet your traveller's aspirations?

Smart Cache gives you multiple real time information in one solution to enable you to inspire your travellers, and present them with a flexible & customisable offer.

### What sets Smart Cache apart?

Smart Cache is an affordable cache solution ideal if you are a Tour Operator, or medium sized Travel Agent receiving fewer than 100 Origin & Destinations.

Implementation is seamless

- This is available only as a web service & is quicker to implement than Extreme Search. Cached data is stored within Amadeus
- Several recommendations are possible by Origin & Departures/Dates

Quick Access to Various Content

- Build & distribute more dynamic packages with a wider range of departure airports, departure dates & duration
- Improve reliability of “from” prices using real time price & availability air data
- Access to both public & negotiated fares

## Increase in Conversion

- Immediate response time
- Avoid re-pricing
- More confirmed bookings
