

The **Amadeus B2B Wallet Credit by AirPlus** allows you to pay all travel suppliers in a more efficient manner, reducing fraud risk and facilitating the reconciliation process.

# Amadeus B2B Wallet Credit by AirPlus

B2B payments made easy

**Travel professionals are faced with a constantly changing payment landscape in the travel industry. Payment products have evolved over the last few years, but existing B2B supplier payment products do not always meet market expectations. This has resulted in the development of multiple payment solutions which often need to be managed separately.**

**Amadeus has partnered with AirPlus International to offer travel professionals a new virtual payment solution for Amadeus travel agencies, the Amadeus B2B Wallet Credit by AirPlus. This virtual credit card solution simplifies payment to travel suppliers, such as rail, hotel and non-BSP carriers, reduces the fraud risk and improves cash flow.**

## Guaranteed global payment acceptance

The Amadeus B2B Wallet Credit by AirPlus provides guaranteed global payment acceptance via UATP and MasterCard worldwide. When UATP payment is not accepted, a virtual MasterCard credit card number is generated during the booking process and this is used to complete the payment.

## Secure payment environment

You benefit from our highly secure payment platform which is fully PCI DSS (Payment Card Industry Data Security Standard) compliant. Additional security is provided by restricted merchant categories, limiting payment to travel providers. Fraud risks are minimised through the one-time use of the generated MasterCard numbers.

## Easier payment reconciliation

The Amadeus B2B Wallet Credit by AirPlus allows you to easily track and reconcile payments, saving time on a daily basis and helping to reduce errors, thanks to cross-referencing with a detailed and comprehensive statement.

## Fully integrated payment solution

The Amadeus B2B Wallet Credit by AirPlus is fully integrated in Amadeus Selling Platform and Amadeus Selling Platform Connect. It is available in cryptic command for travel agency terminals and through web services as a stand-alone service to all applications (not integrated in the PNR).

Up to nine additional Descriptive Billing Information (DBI) data fields, which are captured at the time of booking, can be included to enhance the statement, giving you better transparency and facilitating reconciliation.

## Key features and benefits of Amadeus B2B Wallet Credit by AirPlus

### Free credit line

- \_ Cash flow improved with unique credit line
- \_ No additional funding process required
