You get to spend more time on what you do best: creating amazing travel experiences for your customers.

Any travel agent can benefit, both leisure and business. Travel Agents will especially appreciate the full sales and fulfillment flow, from defining of customer profiles, through search, compare and book, to managing e-Ticketing. Innovative features such as Productivity Suite will help you stay one step ahead of your competitors.

Productivity Suite

Increase your productivity

Tired of one-size-fits-all platforms? Amadeus Selling Platform Connect Productivity Suite delivers a range of timesaving features – such as Smart Flows, File Finishing, Smart Triggers, and Quality Monitor – designed to improve both your performance and your productivity, saving you time and money.

Easy, intuitive interface

The simple-to-use Graphical User Interface (GUI) adapts completely to your way of working and you can easily and seamlessly switch between cryptic commands and the graphical interface at any point in time during your booking while preserving the context. Expert cryptic users can still use the Cryptic environment, with an alternative

easy solution to perform complex or infrequent tasks by switching to graphic, when they want. On the other hand, newcomers will be able to get started quickly with minimal training, by going straight to graphic from day 1.

Manage the entire journey from one place

Manage your customer's entire journey by creating quotes, booking, amending, invoicing and checking payments, all seamlessly from one place.

Ease and efficiency

You can open, and work on, six independent tasks/sessions at the same time, similar to different sheets in Microsoft Excel. Each task is independent, yet remains visible and accessible at all times.

Productivity Suite features

- _ Smart Flows for pre-defined workflows will help you complete tasks more efficiently
- _ File finishing (or 'touchless' processing) will facilitate the completion of Booking Files based on pre-defined rules
- _ Smart Trigger to have an easy way to activate additional customized actions throughout the booking flow
- _ Quality Monitor controls in the booking file will ensure adherence to rules, including warnings, "stop signs" and checks triggered by pre-defined actions

49% average time saving when you do complex and repetitive tasks*
