

Amadeus Web Services latest generation technology offers you unparalleled connectivity from a single point of access to the entire range of Amadeus' comprehensive content.

Amadeus Web Services

Create your own solutions

A cost-effective way to build customised travel booking applications

Constantly evolving online technology means you always need to be able to react to change quickly. Implementing new systems can be slow and problematic while the cost of implementation and development of new products and functionalities in existing or new systems can be expensive.

Amadeus Web Services offers you a cost-effective way to build and update your own customised travel booking applications. It's easy to implement and integrate with existing systems, ensuring that you will always be at the cutting-edge of technology.

Open technology for effortless implementation

Amadeus Web Services uses state of the art open systems architecture and XML formatting to be entirely platform-neutral. It is totally independent of language and application framework, making implementation fast and efficient. You will be able to combine the extensive and reliable source of

information provided by Amadeus with your own business logic and save time by avoiding the necessity of accessing various environments. In addition, Amadeus Web Services has the most comprehensive documentation and automatic code generation in the market, which considerably reduces implementation time.

A long term vision for your technology investments

The adaptable integration of Amadeus Web Services into your systems means that you can now invest with confidence in new software and development languages.

Amadeus Web Services has been designed to give you maximum flexibility at minimum cost, both now and in the future. With Amadeus Web Services, you will no longer be locked into expensive application systems, nor will your choices be hampered by your existing platform and language. Instead, you will be free to use the most innovative and cost-effective technology in the market at next to no development and maintenance costs.

State-of-the art technology

The entire industry is shifting towards a more service-oriented architecture which allows for the incorporation of Web 2.0 developments. Amadeus Web Services is versatile and fully Web 2.0 compliant, allowing you to deploy these new features to their fullest advantage and integrate any future improvements quickly and easily. If excessive server downtime is one of your main concerns, Amadeus Web Services is the solution for you as it conforms to Amadeus' rigorous quality standards and benefits from the highest server up-time guarantees in the market.

Global support

You can count on us to support you during the development and validation phases, with local specialists in your region that can provide product, functional and set-up support. In addition, our Global Support System is available around the clock and applies the highest standards of support and care. You will benefit from customised assistance and streamlined solutions that maximise efficiency, rather than patch existing systems.

Key features and benefits

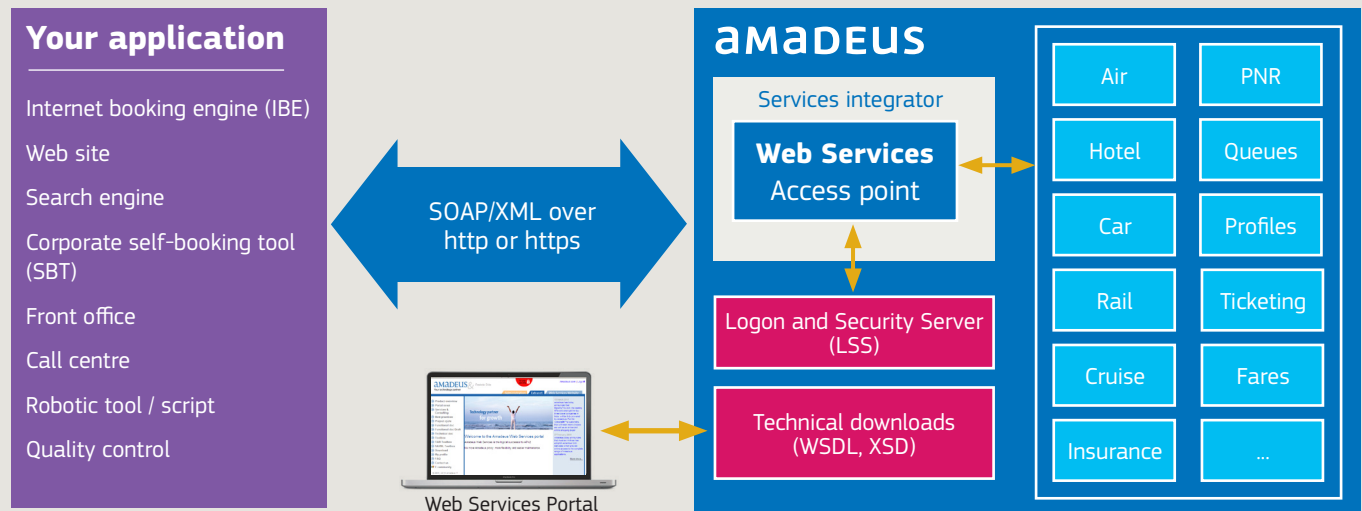

- **Over 500 web services connect you to all Amadeus features**
The flexibility to choose from our wide range of innovative content allows you to create custom applications and deliver unique solutions to your customers.
- **Built on versatile open standards (SOAP/XML over http/https)**
Amadeus Web Services is easy to implement and integrate with your existing systems.

With no platform, language or framework dependency, you're free to take advantage of open source technology to decrease development and license costs.

- **Exceptional performance and reliability**
Amadeus processes more than 100 billion transactions every year and has 99.5% guaranteed server accessibility.

- **Comprehensive support services**
Worldwide support is available 24/7, together with a dedicated customer website containing user guides, technical documentation and best practices.

You can also choose to use our premium services for tailor-made professional training, support, consulting and development.

Trusted technology partner

As the global travel industry's leading technology partner, Amadeus is committed to helping you overcome your biggest business challenges by continuing to provide innovative and advanced integrated solutions, plus best-in-class support and expert consulting services.
