

Listing View & Shopping Basket

Results are shown in ascending price order with the cheapest price from each provider displayed.

Cars can be added to the basket by ticking the box (up to 5).

Once selected click the “compare these rates” button to compare the selected offers.

The screenshot shows the 'Listing view' of car rental offers. At the top, there's a search bar and navigation tabs for 'Selected car rates', 'Filters', and 'Settings'. Below, a table lists offers from providers like Alamo and National. A red box highlights the 'Compare these rates' button at the bottom of the list.

Alternative Views – Category & Map View

The category view shows car availability by car category.

The cheapest car for each category is shown by the golden crown.

The map view shows car rental locations on a map in relation to the point of reference specified in the search criteria, indicating the according rates upon mouse over.

Category View

Map View

Two screenshots are shown. The left one is the 'Category view' showing a list of car categories and their prices. The right one is the 'Map view' showing a map of Paris with car rental locations marked.

Compare Page

Shows the breakdown of charges in relation to the estimated total price.

This page can be printed off or instantly sent to customers via e-mail.

The screenshot shows the 'Compare' page with four offers from providers like Firefly, National, Alamo, and Hertz. Each offer includes details on pick-up, drop-off, and pricing. A red box highlights the 'Print' and 'Email' buttons at the top right.

Confirmation Page

Confirmation is retrieved from the car rental providers in real time.

This page can be sent by e-mail and printed.

The screenshot shows the 'Confirmation' page. It displays the confirmation number (S5644506) and detailed booking information, including car details, rates, and payment terms. A red box highlights the confirmation number.

Make sure you save and confirm your reservation by entering ER (or ET) in Sell Classic.

Further Functionalities

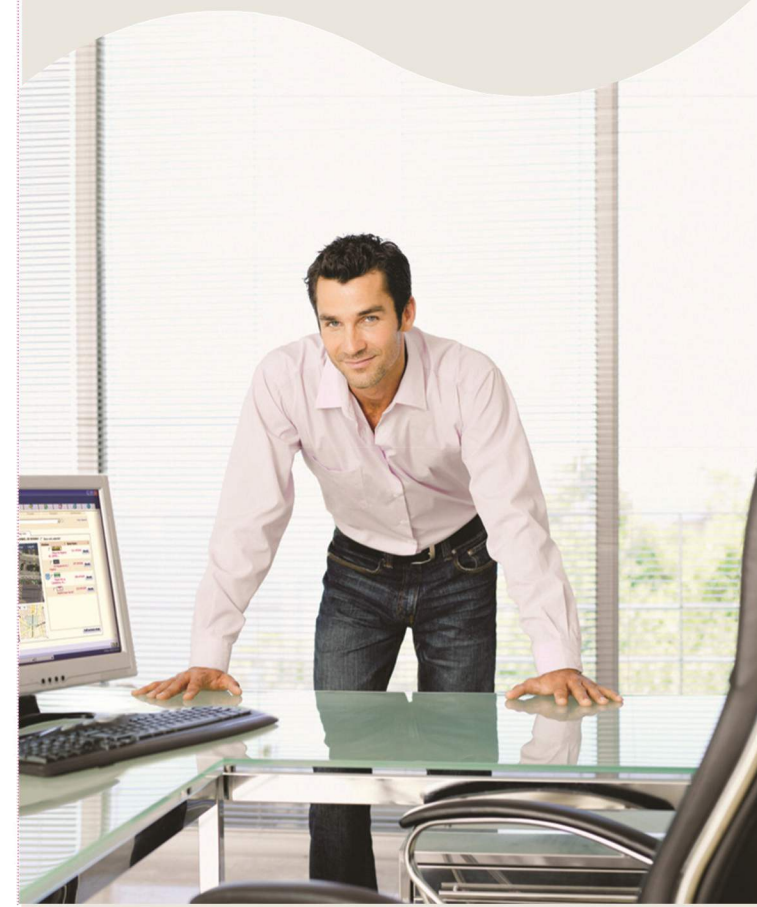

With Amadeus Cars, you can also perform a car booking with Delivery & Collection, as well as selecting special equipment etc.

cars@amadeus.com or visit www.amadeuscars.com.

Amadeus Cars Walkthrough

Quickcard

Introduction & Accessing Amadeus Cars

Amadeus Cars is a rich internet booking engine integrated into the Amadeus Selling Platform.

The graphical interface is accessible from the Cars tab located at the top of the screen.

Arrows just below the Cars icon show what stage of the booking process has been completed.

Search → Cars → Checkout → Reservation

Searching For Locations Using IATA Codes

The Amadeus auto-completion tool makes searching for locations by IATA airport/city codes and city names much easier.

E.g. If you are looking for provider locations in "London" by entering "LON" into the search box a drop-down list of all cities and airports starting with "LON" will appear.

Icons signify what type of location it is.

This is an airport location.

This is a railway station location.

This is a city location, limited to one location per provider.

For more locations you can use the Address or Landmark search.

Searching For Locations Using Address or Landmark

Landmark search enables you to search around a point of reference, address, by postcode and non-IATA cities.

E.g. 1: "Big Ben" will bring up all locations within the set radius of Big Ben.

E.g. 2: By searching for an address including a postcode, such as "SK4 5HJ", all car rental locations within a set radius around this postcode will be retrieved.

E.g. 3: For a railway location enter the station such as "St Pancras".

What Type Of Rate?

Easy Shopper

These are pre-paid rates and will require payment at the time of reservation.

In the listing view all pre-paid rates are indicated with the word 'prepaid'.

All

This displays all possible rates available from providers.

Refining Search For Specified Criteria

Using the "More search options" link you can narrow down your search.

Here you will see you can select:

Car Providers

A drop down list will appear with all car providers.

Vehicle Options

A drop down list will appear with all car classifications.

In addition to this, you have the ability to perform a car availability search for discounted and promotional rates using up to five numbers in one single request.

If you or your customer have a commercial agreement or preferential rates with one or several car rental providers, you need to enter the Discount Number.

To apply this rate enter the discount rate details and click "Search".
