

Amadeus for Hotels Aggregator Content

Amadeus for Hotels content choice

Your challenge

Hotel booking processes are rarely standardised across points of sale. This means shopping for rates across a variety of channels, both GDS and third party websites, and even double checking with hotels directly. This wastes both time and money, not just when researching and making bookings, but with paperwork and data consolidation afterwards. How can you make the whole process more efficient while ensuring your commission is also guaranteed?

Our answer!

Amadeus for Hotels adds clear value to our customers. Don't waste time shopping across different channels. With our centralised content platform you have access to over 1M properties and around 310 chains. We have simplified the whole process to make it much more efficient for bookers: from quantity and quality of content to simplified, intuitive booking flows and mid and back-end processing.

Benefits

-  Integration of leading **global hotel aggregators** to Amadeus for Hotels
-  Faster, more efficient sourcing and booking via a **single intuitive screen**
-  **Rates from all providers** - chains, representation companies and aggregators are quickly and easily compared
-  Full front, mid and back-office **integration**
-  Enhanced offering with a **wider choice** of properties and rates plus full traveller services
-  Any existing **agreements** you may have with aggregators are **recognised and respected**
-  Offer pre-paid rates with **commission upfront** as per our aggregators partners' conditions
-  **Efficiency and support** assured by both Amadeus and our hotel aggregator partners

*Amadeus for Hotels gives you access to **+1M properties**, including content from top regional and global aggregators.*

What can Amadeus for Hotels do for me?

With Amadeus for Hotels you get a one-stop shop search platform that amalgamates content from top hotel aggregators and the world's leading hotel chains and representation companies into an intelligent single screen solution, with vast content breadth and increased rates and efficiency.

CHOICE

Our hotel content from aggregators is seamlessly integrated into the Amadeus shopping display and follows the same automated booking method and flow. Payment settlement is handled according to each aggregator's individual specifications.

Thanks to this, we offer unique search-engine powered comparative shopping and booking within our existing point of sale solutions, such as Amadeus Hotels Plus, our self-booking tools and Amadeus Web Services, to feed this vast content choice into your own front-end.

TOOLS & KNOWLEDGE

Our new intelligent search engine delivers additional, enhanced search filtering criteria across points of sale. These include prepaid or promotional rates, extra low rates, facilities, family rooms and advanced geo-coding, making searches faster and much more precise.

You'll be able to check, with unparalleled response times, multiple rates from various providers for the same property by room or day. And once you are ready to book, you can make up to nine bookings simultaneously.

REWARD

By providing a far greater instant choice of properties to view, compare and book, together with full traveller services, your overall offering and value to your clients will also improve. The estimated earnings indicator will allow you to compare multiple hotel offers to see which is the most profitable. In addition to this, full integration of pre-paid rates, transparent payment options and commission guarantees (when available) mean that you will benefit more than ever from fast access to consistently high quality content, instant booking capability and unparalleled response times.

As well as generating immediate front-end efficiencies, you and your customers will benefit uniquely from full mid and back-office integration for aggregator content, reducing manual processes and paperwork at all stages of the process.

How to take advantage?
