

# Amadeus Selling Platform Connect

Quarterly product update: Q2 2025

New enhancements. Key highlights. Productivity hacks.

## NDC: Stay informed with commission info in Air Shopping

Instantly view commission details for supported NDC airlines like Qantas and American Airlines—right in the results page, Booking summary (price details), and FM element in booking file. More airlines coming soon!

## NDC: Manual reprice with corporate code

You can now manually reprice unpaid Singapore Airlines (SQ) orders from the Booking File to apply corporate codes before payment—making every fare count.

## NDC: Passenger name update on paid orders

You can now easily update a passenger's name in an NDC booking after it's been issued—making it simple to fix errors and meet your travelers' needs. This feature offers the same flexibility you're used to with non-NDC bookings, plus a smoother, more intuitive experience.

## Queue handling is now faster and more intuitive

Travel consultants can now manage queues and act on PNRs seamlessly—right from the GUI. We've replaced the existing queues in Selling Platform Connect's graphic mode with a more intuitive, efficient interface.

## Find the right hotel, faster

Hotels Plus now puts the most-used filters right where you need them—at the top. Enjoy a smoother, faster search experience and get the best options with less effort.
